

" Reflexes "

sculptures

Daniela Capaccioli

Bagno Vignoni

9 th April to 30 th June 2017

Nymphs, fauns and magical creatures take shape in the sulphurous waters flowing in Bagno Vignoni.

They appear as evanescent reflections when the hot steam cloud the view and leave perceive shapes and shadows of hidden worlds.

Observing carefully , you can see them while peek at you through your own reflection in the waters of the thermal tank, in the flow of a river or in a simple puddle of water formed after the rain.

Look good, in depth! This Creatures are there waiting for you to take you on a sweetly intimate and quiet trip.

Water, as a mirror, turns upside down our image but, at the same time, deforms and transforms it thanks to its light flicker, reflections of light, mists and its changing colors.

Become thus "other" in contact with water, return children into maternal womb, flickering fishes, nymphs, fauns and all those images and memories etched in ancient memory.

This "other" surficing through the reflection, accompanies all those who are ready to follow him, in a mysterious world that attracts and repels at the same time.

This "other", attracted by its own image, as were Narcissus and Ila, sinks itself in depth of water to join itself. What it discovers can save or swallow it forever.
